Bed Bug Treatment Preparation Instructions

- ⇒ Please strip all bed sheets, linens and blankets for proper laundering (including any pull-out sofas or beds). Remove all covers from sofas and chairs as we will be treating these as well.
- ⇒ Any clothing stored in the bedroom, especially adjacent to the bed and in dressers/nightstands should be inspected for insects and properly laundered. Any miscellaneous stored items (books, papers, make-up kits, etc.) should also be inspected and treated or discarded if necessary .
- ⇒ Curtains, dust covers, rugs or throws must also be laundered, especially if adjacent to the bed.
- ⇒ After items have been laundered or otherwise disinfected they may be returned to drawers and storage once the products used to treat have dried.
- ⇒ All pet bedding (if applicable) should be washed or treated accordingly. As Bed Bugs will bite pets if humans are unavailable, a good flea treatment is recommended (Frontline is best)
- ⇒ Please allow proper ventilation of the treated areas and do not return items or occupy areas until the product is dry and the air is clear.
- ⇒ It is not necessary to discard items like clothing and furniture if infested. It is possible to treat or disinfect almost any household item. Only discard items if recommended by the technician or if you feel there is no other option. **THIS COMPANY IS NOT RESPONSIBLE FOR REPLACING ANY ITEMS YOU DISCARD.**

THIS COMPANY DOES NOT TREAT OR INSPECT THE FOLLOWING ITEMS:

- ⇒ Wallets, purses, make-up bags, clothing, accessories or shoes
- ⇒ Jewelry boxes, safes, computers, electronics or filed papers and documents

PLEASE BE AWARE OF THE FOLLOWING:

- ⇒ It is possible to kill all stages of Bed Bugs by one of the following measures:
 1. Drying items on HIGH in a commercial dryer for no less than one hour.
 2. Placing items in the freezer for no less than 4 days, uninterrupted if possible.
 3. Placing items in a small area or sealed garbage bag with a Nuvan Pro Strip for at least 7 days
- ⇒ ActiveGuard box spring encasements (if installed) cannot be washed
- ⇒ Mattress Encasements may be washed but must be reinstalled properly using the zipper hook
- ⇒ ClimbUp Insect Interceptors must be kept clean, dry and dusted with a light residue of talc (as installed)
- ⇒ If you have questions about individual items or procedures, please discuss them with a representative of this company BEFORE your first service.
- ⇒ Please allow two weeks for the treatment to take effect. Although the products act on individual insects almost immediately, their effect on a population of insects takes at least 14 days to become apparent. Also, NJ Sate law requires a 28 day waiting period between applications of this product and nature.
- ⇒ Using over the counter pesticides or repellents on your own is strictly prohibited. Liquid detergents or steam cleaning after our application will remove the products used and nullify the treatment, please clean in this fashion before we make our application.
- ⇒ **WARRANTY IS NULL & VOID IF PREPARATION INSTRUCTIONS ARE NOT ADHERED TO.**
